

# Climate - friendly Transport development for Thailand

## Berlin, 18 September 2017

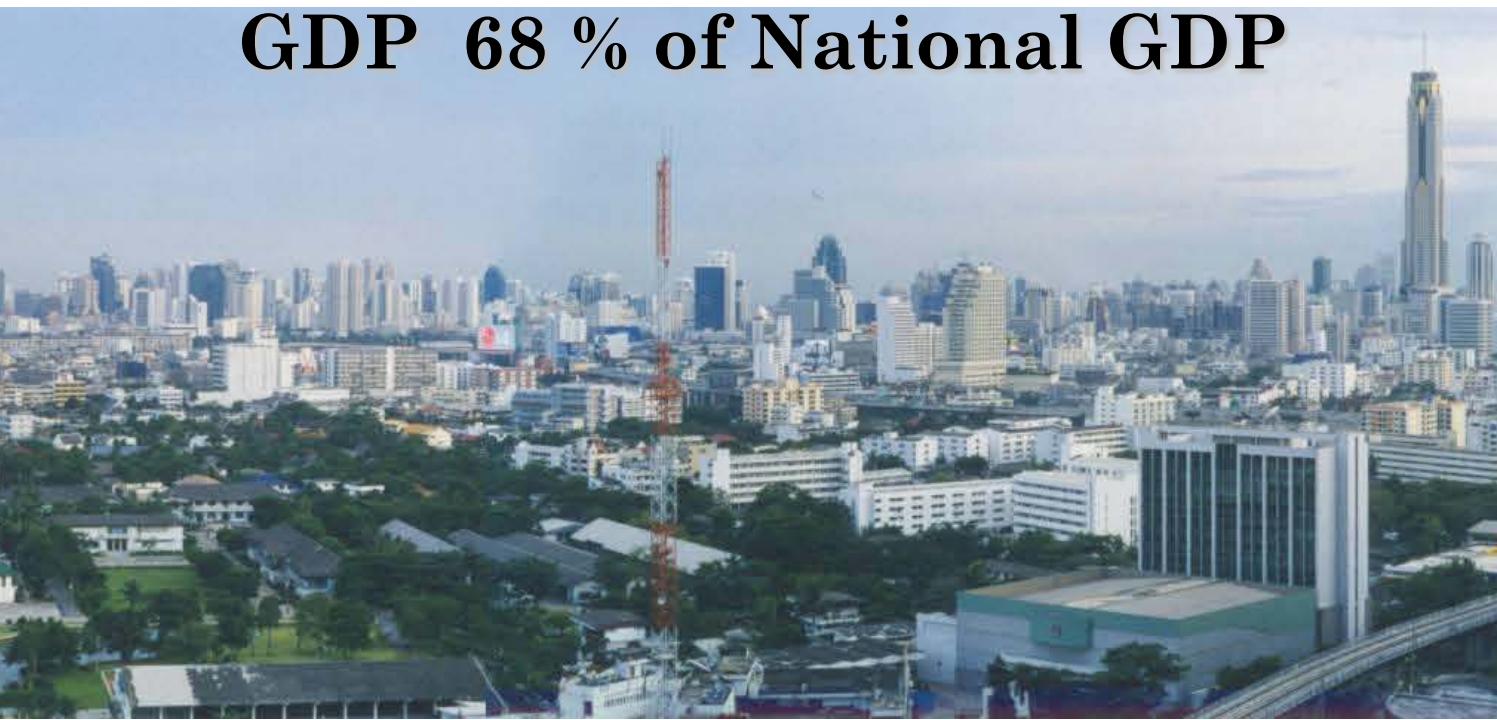

Chutinthorn Mankhong  
Office of Transport and Traffic Policy and Planning (OTP)  
Thailand

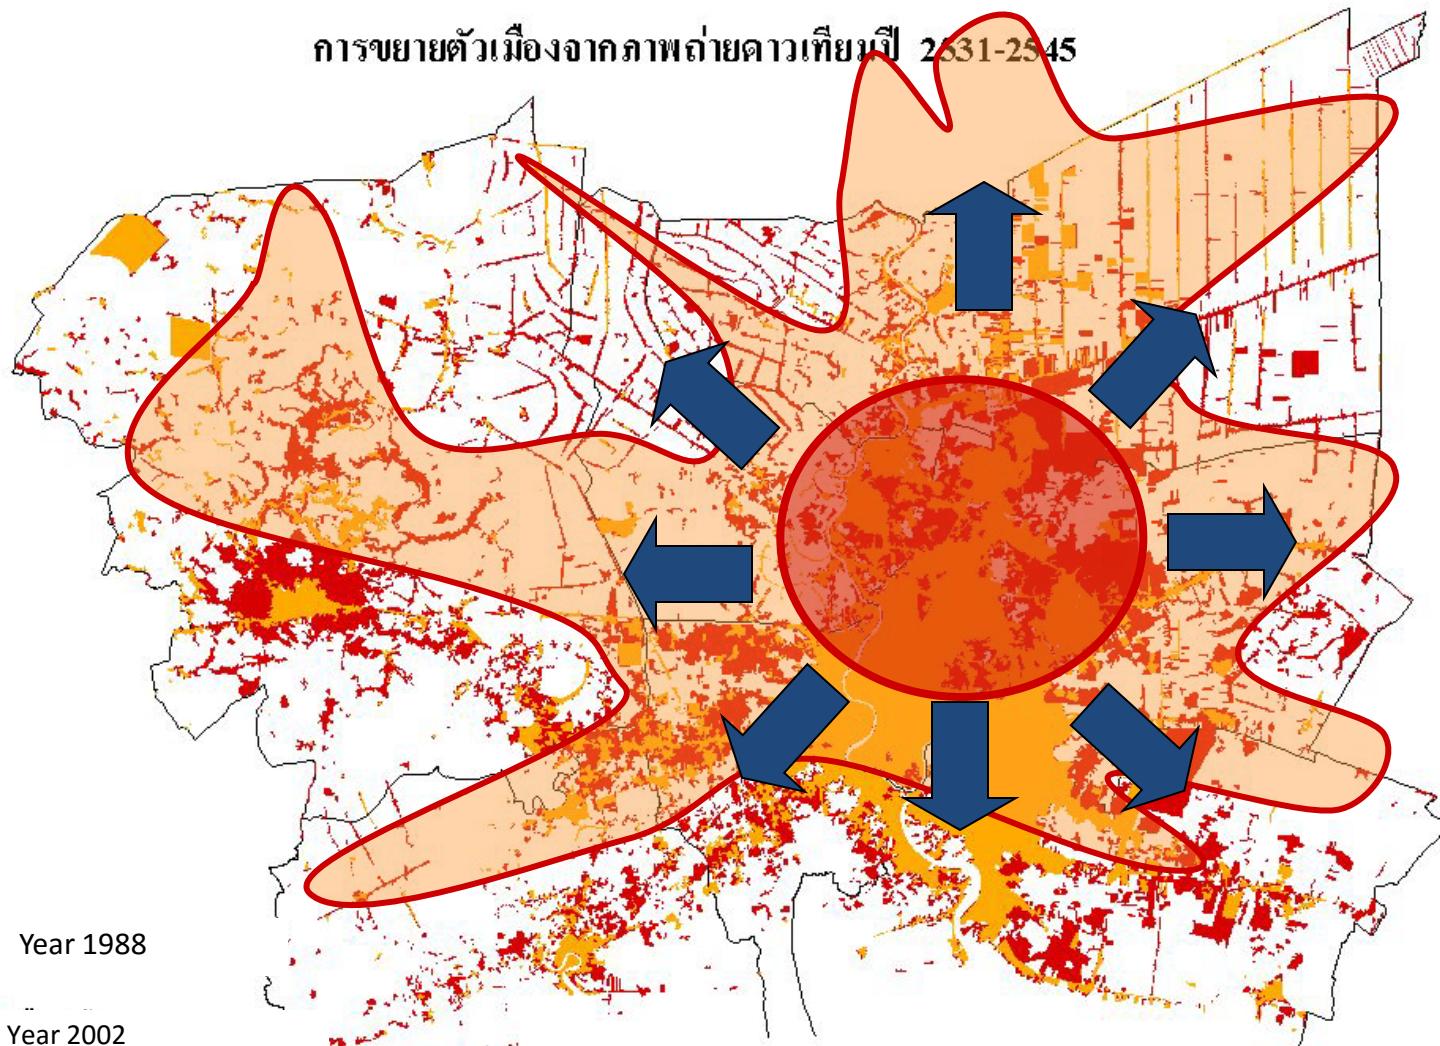

# TOPIC

- Current situations
- NAMAs and NDC in Transportation
- People-centered Urban Mobility in Thailand

**Bangkok Metropolitan Region , BMR**  
**POPULATION : 17.5 millions**  
**AREA : 7,760 sq.km.**  
**GDP 68 % of National GDP**

# Bangkok's Land Use (Urban Sprawl)

ขอบเขตพื้นที่ศึกษา

# Bangkok situation

# Quality of Life

The CO<sub>2</sub> PROBLEM IS A TRANSPORT PROBLEM,  
PREDOMINATELY CARS AROUND URBAN  
AREAS

# Travel Pattern of people in Bangkok

Total

22

Mil.Trips/Day

Mass Transit 3.5%

Bus 36.4%

7.98  
Mil. trips/Day

BTS

0.64  
Mil. Trips/Day

MRT

0.22  
Mil. Trips/Day

Car 56.9%

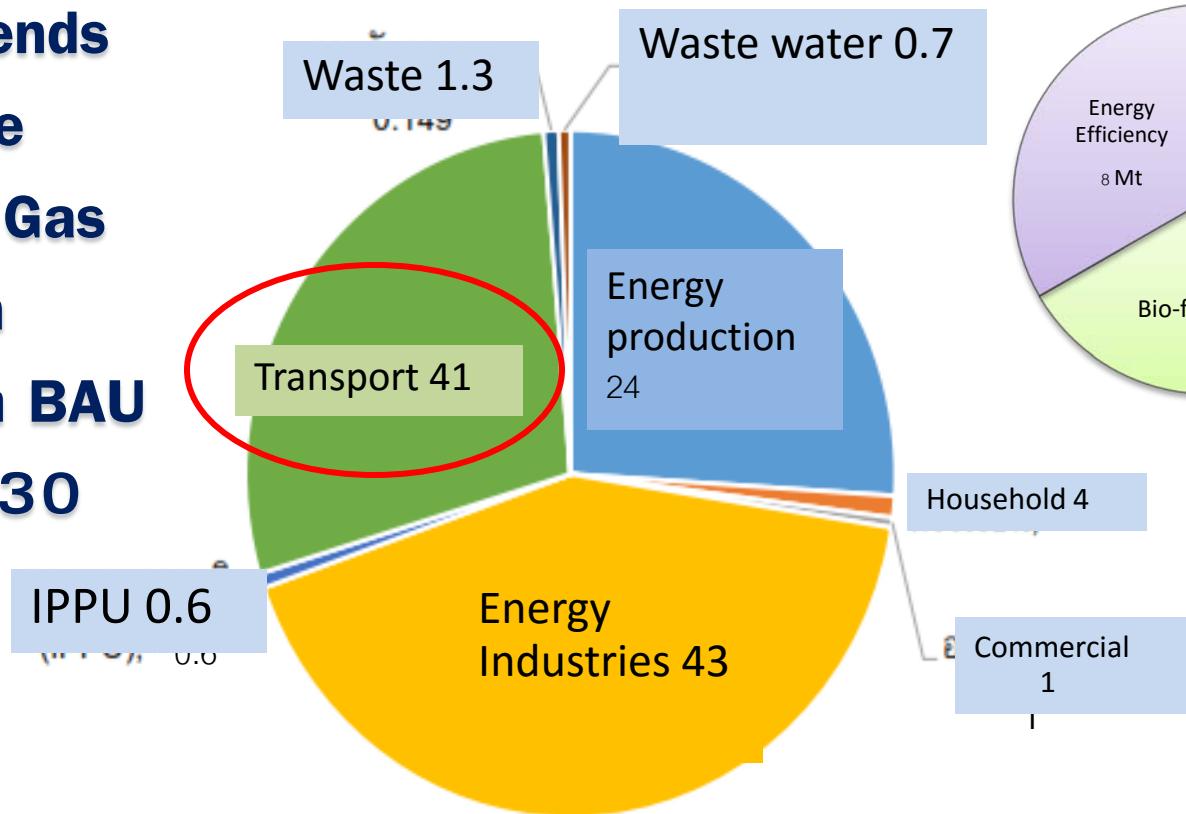

12.5  
Mil. Trips/Day

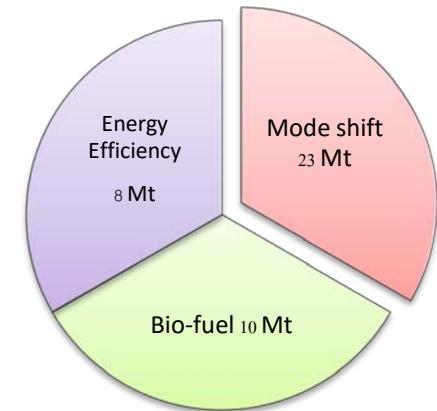

# Thailand's National Determined Contribution

**Thailand Intends  
to Reduce  
Greenhouse Gas  
Emission  
By 20% From BAU  
Level By 2030**

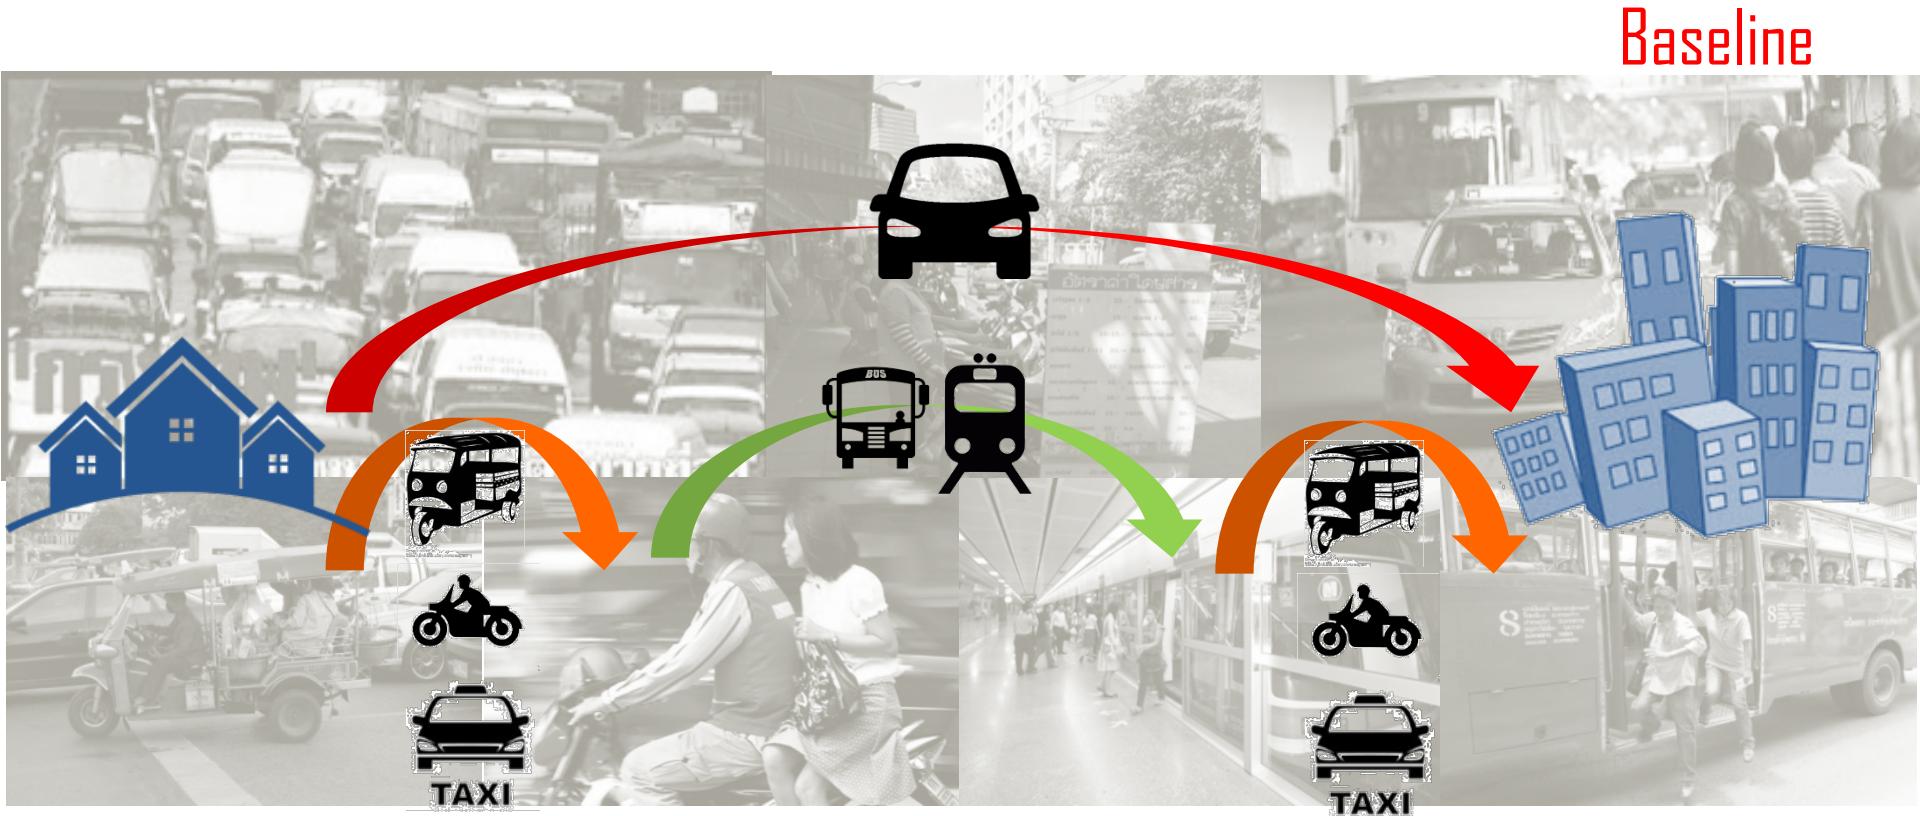

115.6 MtCO<sub>2</sub>

(ร้อยละของการลดก๊าซเรือนกระจก, ผลรวมคิดเป็นร้อยละ 20 ณ ปี ค.ศ.2030)

# People-centered Urban Mobility in Thailand

Existing means of passenger transport in urban areas

## National Policy Framework promoting Bus and NMT as feeder modes

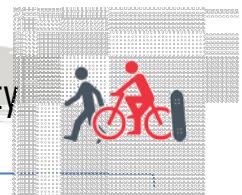

### Bus Public Transport Management

Improved bus stations

Dedicated bus lanes / BRT

Bus route optimization and institutional reform

Real time traffic information

### Non-Motorized Transport Accessibility

Cycling  
(Parking, bike lanes, unblocking sois)

Walking  
(PT stations, Street crossings, sidewalks, cover and shade)

Parking management and pricing

Accessibility of footpaths  
(vendors, objects)

Shared road concepts  
(speed limits, signage)

Infrastructure

Regulation & Planning

Information & Communication

Branding and awareness

Awareness Campaigns  
(benefits and branding of PT and NMT)

'NMT-friendly Neighborhood'  
(Branding, events)

Strengthening of Data and Monitoring (MRV)

# The design of bus routes and infrastructure for public transport connectivity

<http://goo.gl/FUp87U>

<http://goo.gl/AArnnu>

New BMTA's buses which is compatible to  
environmentally friendly fuel

Integrated ticket

# Expected greenhouse gas emission reduction (rough calculation)

Activities for greenhouse gas emission reduction	The estimated greenhouse gas emission reduction in 2030* (million ton CO <sub>2</sub> )
1) Urban Public Transport Connectivity by Non-Motorised Transport (NMT)	0.05 – 0.3 
2) Public transport management	0.1 - 0.7
Total	0.1 - 1.0

# Improving public bus services and **Non-Motorised** transport in Bangkok

## Conclusion

- This concept can be replicated to new construction public transit lines in the future
- Need the improvement in all aspects: Infrastructure, Regulation and planning and Information and communication
- Need cooperation from various stakeholders
- Need to raise public awareness to people

The number of station according to rail network master plan (after adjusted gray line)  
 Interchange station : 52 stations  
 non-interchange station : 222 stations  
 Total station : 274 stations

Rail transit network master plan in Bangkok and vicinities
